

MD. JASIM

Full Stack Developer · MERN · Next.js · TypeScript · PostgreSQL

+880-1715-052-808 · ismailjosim@yahoo.com · www.ismailjosim.com · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of hands-on experience building production-grade web applications using React, Next.js, TypeScript, Node.js, and PostgreSQL. Shipped multi-role SaaS platforms with role-based access control, payment integrations, and real-time dashboards — including Career Graph, a job-application tracking platform in production with admin/recruiter/job-seeker roles and integrated billing. Proven ability to architect scalable systems, mentor 2,000+ developers, and deliver clean, maintainable code aligned with modern industry standards.

TECHNICAL SKILLS

Expert — Next.js 16, React 19, TypeScript, Node.js, Express.js, PostgreSQL, Prisma ORM, MongoDB, Better Auth, JWT, RBAC, REST API Design, Tailwind CSS v4, shadcn/ui, Git/GitHub

Proficient — Mongoose ODM, Redux Toolkit, RTK Query, TanStack Query, React Hook Form, Zod, Radix UI, Google OAuth 2.0, Redis, Stripe, Polar (payments/billing), SSLCommerz, Cloudinary, Recharts, Vercel, Vitest, Webhooks

Familiar — Nodemailer, Resend, node-cron, Postman, Material UI, Ant Design, Linux

Tooling — Vercel, Netlify, Firebase, Biome, Husky, ESLint, Prettier

PROJECTS

Career Graph — Next.js 16 · React 19 · TypeScript · MongoDB · Mongoose · Better Auth · Polar SDK [GitHub](#) | [Live](#)

- Built and deployed a production job-application tracking SaaS with a 3-tier role system (admin/super_admin, job seeker, recruiter), each with independently authorized dashboards and API access.
- Integrated Polar for subscription billing and payment handling, alongside a resume manager, cover-letter editor, wishlist, and an AI-assisted job-fit scoring feature.
- Built analytics dashboards (Recharts) surfacing application, interview, and response-rate metrics in real time, backed by a Mongoose/MongoDB schema layer with Zod-validated API routes.
- Shipped a full dark/light theme system with zero flash on load, responsive mobile-first layout, and safe-area support for notch devices.

Habitix — Next.js 16 · React 19 · TypeScript · PostgreSQL · Prisma 7 · Better Auth [GitHub](#) | [Live](#)

- Architected a 5-role RBAC system (Student, Mentor, Admin, Moderator, Corporate Viewer) with platform-role and team-role as independently-checked dimensions, server-enforced and verified by an automated permission audit wired into CI.
- Solved point-award idempotency on a team-scoped Help Desk: accepted answers trigger a one-time point award, requiring duplicate-award/race-condition guards at the database layer rather than the client.
- Ran Prisma 7 through the @prisma/adapters driver adapter on Neon serverless Postgres with Better Auth, keeping the auth and data layers serverless/edge-compatible end to end.

Traveler — React · TypeScript · Node.js · Express · MongoDB · Redis [Client](#) | [Server](#) | [Live](#)

- Built a full-stack tour booking platform across 3 user roles (traveler, guide, admin) with 30+ REST endpoints spanning auth, tours, bookings, reviews, and payments.
- Integrated SSLCommerz for payment processing with automated PDF invoice generation and confirmation email dispatch; designed dual auth paths (JWT access/refresh + Google OAuth via Passport.js) sharing one authorization layer.
- Added a Redis caching layer for frequently-read data (tours, stats) alongside MongoDB indexing to cut redundant DB hits on high-traffic read endpoints.

DevVault — Next.js 16 · React 19 · TypeScript · MongoDB · Mongoose · Better Auth · Tailwind CSS v4 [GitHub](#) | [Live](#)

- Built a secure developer workspace for managing environment variables, secrets, and project configs, with every secret AES-256 encrypted at rest (crypto-js) and decrypted only for the authenticated owner.
- Designed a schema-diffing "Missing Env Checker" that compares a project's live variables against its .env.example to surface missing, extra, and matched keys before deployment.

Currently Building — **Ahar Bengal** — Next.js 16 · TypeScript · PostgreSQL · Prisma · Better Auth · Express.js

- Building a multi-tenant restaurant management SaaS with role-based dashboard access, menu browsing, cart/checkout, and order tracking with history. Backend on Express 5 with JWT (jose), rate-limited endpoints, and SSLCommerz payments; inventory, staff reporting, and payments-dashboard modules are the current focus.

PROFESSIONAL EXPERIENCE

Senior Web Instructor (Full-Stack Development) | Programming Hero

Apr 2025 – Present · Dhaka, BD

- Architected and built 10+ production-grade demo SaaS applications covering auth, payments, dashboards, and API integrations used live by 2,000+ active learners.
- Designed full-stack systems with React, Next.js, Node.js, and PostgreSQL, demonstrating real engineering workflows including error handling, role-based access, and deployment.
- Led live code reviews and architecture sessions, improving learner project completion rates and code quality across Batch 14 (first AI-first cohort).
- Recipient of Instructor Excellence Award for technical depth and learner impact.

Web Instructor (Full-Stack Development) | Programming Hero

Jul 2023 – Apr 2025 · Dhaka, BD

- Built and maintained MERN-stack demo applications and reusable component libraries used across course modules, simulating real SaaS product workflows (booking, auth, dashboards).
- Conducted 200+ live debugging and mentoring sessions, directly supporting developer growth across multiple cohorts.

Web Developer Intern | Winsple

Jan 2023 – Feb 2023 · Dhaka, BD

- Developed reusable React components and integrated REST APIs as part of a cross-functional product team; contributed to bug fixing and UI performance optimization.

EDUCATION

Self-Taught Full Stack Developer · 2022 – Present

3+ years continuous learning through project-based development, open-source contribution, and peer mentorship.

MBA (Accounting) · BBA (Accounting) — National University, Bangladesh · 2016 – 2022

ACHIEVEMENTS & COMMUNITY

- Instructor Excellence Award recipient at Programming Hero.
- Mentored 2,000+ aspiring developers through structured MERN and Next.js programs across multiple cohorts.
- Published Bengali-language technical articles on JWT, Better Auth, ESLint/Prettier setup, and React naming conventions targeting the Bengali-speaking developer community.
- Maintains an active open-source GitHub profile with educational projects and reusable component libraries.
